OFFICE RENTAL
Those who rent an office are present in the Main Laboratory with workstations, therefore they have to agree that visitors are allowed to get an insight into the activities that take place there. These bases also serve as points of sale, which means that customers may be coming and going. From the different Informatorium services they can also use screening and the meeting rooms.

MEETING ROOM RENTAL
The Smart Room and the living room of the intelligent home can be used for organising business negotiations or representative meetings. (related services: slide-ware, designing and preparing presentation material, coaching, etc.). The Smart Room is also perfect for holding video conferences, optionally adding the screen wall capacity of the main hall.

VIRTUAL REPRESENTATION
The Service Platform is a representational and sales space where those firms can find their place that do not rent an office but intend to be present with their products, services and devices. It is these companies who bring the 2-3 people working at the Service Platform. Besides providing information personally, dissemination materials and screening capacity are available too, what is more, remote connection and remote consultation are also offered if possible. The Service Platform acts as some kind of clearing house: information from the supply side keeps coming in – be it digital multimedia content or traditional brochures – and if there is demand for these, they can be presented to the visitor side.

THE INFORMATORIUM CONNECTS AND ENRICHES

Dubliners, who often quote Joyce’s immortal words: “...and in my house in the heart of Dublin, there were no doors...” are not necessarily Irishmen. The Informatorium smartly integrates the house and the city into an environment in which the visitor is not only allowed, but even expected to walk, experience, experience, tour, discover, and discover – and even to participate. The place, the Inner City, and the University are all one – and all one must be seen and experienced by the visitor. The informatorium creates a functional room with an experienced one, with a creative one, and with an active one. The informatorium creates a place where people can make the experience of doing and the experience of creating, where people can make their mark and their own paths.
